

Wireless Content Sharing and Collaboration

Connect to a Solstice Display

Open the Mersive Solstice app, find your Solstice display, then click to connect.

If prompted, enter the 4-digit screen key visible on the display.

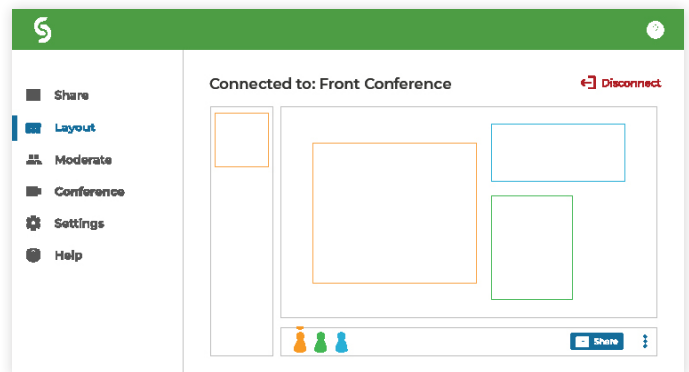

Share, Control, and Mark Up Content

Share content to the Solstice display using the options in the Share tab.

Arrange, control, dock, and stack shared content on the Layout tab.

Temporarily mark up the display using the Ink option in the mobile app.

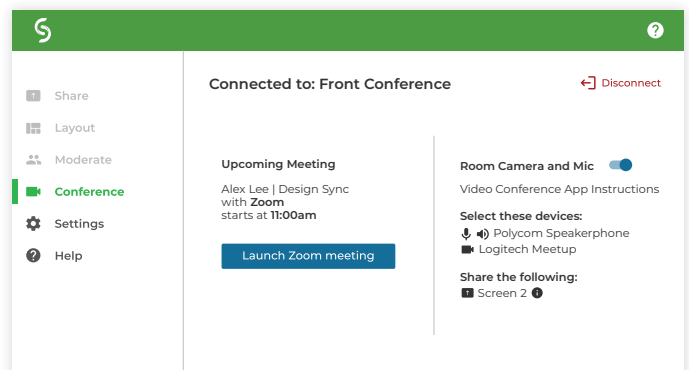

Other Ways to Control Content on the Layout Tab

- Drag and drop posts on or off the on-deck panel.
- Press and hold, or right-click, a post to view more control options.
- Pinch-to-zoom a post on touch-enabled devices.
- On mobile devices, press and hold the red dot to temporarily mark up the display.

Connect a Video Conference

Use the Conference tab to connect a video conference to your Solstice collaboration session.

Once your conference is connected, select to share Screen 2 in your video conferencing app so remote participants can see the Solstice display.

Need the Mersive Solstice App?

Enter the IP address on the display into a web browser, then click **Get the App** to download.
On a mobile device, download the free Mersive Solstice app from the app store.
