

Get the app and start sharing

Get the app on your laptop

1. Connect to Wifi

2. Go to the URL

3. Download the App

Get the app on your mobile device

Available on the App
Store and Google Play

Scan QR code to
download the mobile app

Share content and collaborate

In the Solstice app, find the room display's name, and click to connect.

- Use the Share panel to share content to the display
- Use the Layout panel to arrange and control content
- Use Solstice Ink (mobile-only) to highlight and mark up content

If you're not seeing a list of displays in your app, connect to a network listed on the display and enter the display's URL.

Host your video conference

If you haven't already, open your Solstice app and go to the Conference tab, then install Solstice Conference.

Before you meet, invite the room to your meeting, or add your Microsoft calendar to your Solstice app.

Get your web conference started

1. In your laptop system tray, click the Solstice icon, then enter the display's screen key or URL.

Note: If your meeting isn't started automatically, launch it from your web conferencing app.

Web Conference

Bridge to: **Start Conference**
with Zoom

Enter the Screen Key: 2 0 1 0

☐ Bridge without this calendar event

2. Pick your room audio and video sources, such as the room camera or microphone.

Select a Microphone

✓ Echo Cancelling Speakerphone (Logitech Meetup Speakerphone)
Same as System

Select a Speaker

✓ Echo Cancelling Speakerphone (Logitech Meetup Speakerphone)
Same as System

3. In the web conferencing app, select to share "Screen 2" so remote attendees can see what's on the in-room display.

Select a window or an application that you want to share

1 Screen 1

2 Screen 2

Share

4. Once you're done, end the web conference and disconnect from the display.

Are you sure you want to leave?

No Yes
